

TECH UPDATES FROM

Becontree Digital Leaders

Hi,

We are the Becontree Digital Leaders, a group of children who help keep our ICT equipment tidy and help with other ICT jobs around the school.

We are very excited to release and share with you the very first edition of our new project - a newsletter. In this newsletter, we will keep you up-to-date with ICT news and activities, ways to stay safe online, games and urban myths that you don't need to worry about!

One of the most important aims we are working on currently at school is pupil voice. With this newsletter you will have more opportunities to express your opinions through votes and questions coming up in future editions. Keep a look out for that! In the meantime, enjoy!

The Digital Leader Team

eSafety

We have all enjoyed sharing information about safety on the internet with you in our assembly. We hope you liked our assembly. Just in case you have forgotten, you should never give out your personal information on the internet; you should never meet up with strangers that you have met online. Strangers might ask you for a photo or video that includes you or people that you know. Never share these. These are just a few of the safety precautions you can take to make sure you are not in danger online. Stay Safe!

I'm sure many of you love the apps Talking Angela, Talking Tom and all other games by Outfit 7. Some users believe there are cameras in the characters' eyes and are afraid to play the game. But I reassure you it is not true. It is simply an urban myth. For more information and proof, check out this website:

Did you know?

The world wide web and the internet are two completely different systems but they are closely linked. The ability to connect computers was created in 1983 by researchers Vint Cerf and Robert E. Kahn. These connected computers are the internet. The World Wide Web as we know it was created in 1989 by computer scientist Tim Berners-Lee. The world wide web is the collection of all web pages on the internet.

We hope you liked our newsletter and are looking forward to our next one! And if you are going to be using the internet to revise for upcoming tests remember- stay safe!
