# 1. Introduction

The Standards and Testing Agency (STA) is responsible for the development and delivery of statutory tests and assessments. STA is an executive agency of the Department for Education.

The 2023 tests assess the national curriculum. This test has been developed to meet the specification set out in the test framework[1] for mathematics at key stage 2.

A new test and new mark schemes will be produced each year.

Key stage 2 tests are marked by external markers, who receive training to ensure the mark schemes are applied consistently and fairly. The mark schemes are provided to show teachers how the tests are marked. The pupil examples are based on responses gathered from the test trialling process.

Scaled score conversion tables are not included in this document. Conversion tables will be produced as part of the standards maintenance process. Scaled score conversion tables[2] for the 2023 tests will be published in July 2023. The standards confirmation meeting will take place in June 2023.

# 2. Structure of the test

The key stage 2 mathematics test comprises:

- Paper 1: arithmetic (40 marks)
- Paper 2: reasoning (35 marks)
- Paper 3: reasoning (35 marks)

# 3. Content domain coverage

The 2023 test meets the specification in the test framework. Table 1 sets out the areas of the content domain that are assessed in Papers 1, 2 and 3.

The references are taken from the test framework. A question assessing 4C7, for example, sets out to 'multiply two-digit and three-digit numbers by a one-digit number using a formal written layout' and is taken from the year 4 programme of study.

# 4. Explanation of the mark schemes

The marking information for each question is set out in the form of tables (sections 7, 8 and 9).

The purpose of the mark scheme is to define the acceptable answers for each question within the test. Answers other than those listed may be acceptable if they meet the marking criteria.

The '**Qu.**' column on the left-hand side of each table provides a quick reference to the question number and part.

The '**Requirement**' column may include two types of information:

- a statement of the requirements for the award of each mark, with an indication of whether credit can be given for an appropriate method
- examples of some different types of correct answer

The '**Mark**' column indicates the total number of marks available for each question part.

The '**Additional guidance**' column indicates alternative acceptable answers and guidance, such as the range of acceptable answers, where necessary. This column may also provide details of specific types of answer which are unacceptable. For most questions, there will be unacceptable answers that are not listed.

# 5. General marking guidance

## 5.1 Applying the mark schemes

To ensure consistency of marking, the most frequent procedural queries are listed in section 5.2 along with the action the marker will take. This is followed by further guidance in section 6 relating to marking questions involving money, time and other measures. Unless otherwise specified in the mark scheme, markers will apply these guidelines in all cases.

**Recording marks awarded**

Pupils' test papers are scanned so that marking can be conducted on screen by trained markers.

For each question, markers record the award of 3, 2, 1 or 0 marks as appropriate, according to the mark scheme criteria. There is provision in the software to record questions not attempted. The software aggregates marks automatically.

Sourced from SATs-Papers.co.uk • https://www.SATs-Papers.co.uk

## 5.2 General marking principles

**Table 2: General marking principles for all papers**

| | |
|---|---|
| **1. The answer does not closely match any of the examples given in the mark scheme.** | Markers will use their judgement to decide whether the answer corresponds with details in the 'Requirement' column of the mark scheme. Reference will also be made to the 'Additional guidance' column. |
| **2. The answer is provided in a non-standard way.** | Pupils may provide evidence in any form as long as its meaning can be understood. Diagrams, symbols or words are acceptable for explanations or for presenting an answer. |
| **3. The correct answer or working has been crossed out or erased and not replaced.** | The mark(s) will not be awarded for crossed-out or erased answers or working. |
| **4. More than one answer is given.** | If all answers given are correct (or a range of answers is given, all of which are correct), the mark(s) will be awarded unless the mark scheme states otherwise. If both correct and incorrect answers are given, the mark(s) will not be awarded unless the mark scheme states otherwise. |
| **5. No answer is given in the expected place, but the correct answer is given elsewhere.** | Where a pupil has unambiguously indicated the correct answer, the mark(s) will be awarded. In particular, where a word or number is expected, a pupil may meet the requirement by annotating a graph or labelling a diagram elsewhere in the question. |
| **6. The answer is correct, but the wrong working is shown.** | A correct final answer will be awarded the mark(s). |
| **7. The pupil has used alternative notation for a decimal point in a number.** | No alternative notation is accepted as representing a decimal point in a number, for example, a comma.<br><br>Refer to section 6 for guidance on marking specific types of question. |
| **8. The pupil has used a symbol as a thousands separator.** | If the pupil has used a comma as a thousands separator (positioned either correctly or incorrectly) and the digits are in the correct order, then the mark(s) will be awarded.<br><br>If any other symbol, for example, a decimal point or apostrophe, is used, the mark(s) will not be awarded, although method marks may still be available. |

Sourced from SATs-Papers.co.uk • https://www.SATs-Papers.co.uk

| | |
|---|---|
| **9. The answer in the answer box is wrong due to a transcription error.** | A transcription error occurs when a pupil miscopies their answer from the end of their working into the answer box.<br><br>Each part (integer, numerator, denominator) of a mixed number is considered separately when applying transcription error rules.<br><br>Where appropriate, detailed guidance will be given in the mark scheme. For questions with no guidance, marks will only be awarded for a transcription error if the wrong answer is due to:<br><br>• transposed digits in a number (for example, 243 is written as 324)<br><br>**OR**<br><br>• one digit changed in a number of 4 or more digits (for example, 2,345 is written as 2,845)<br><br>The mark(s) will not be awarded for any other transcription error including:<br><br>• a decimal point positioned incorrectly (for example, 12.34 is written as 1.234 or 1234)<br>• a change by a power of 10 (for example, 200 is written as 20 or 2,000)<br>• a digit added or removed (for example, 123,456 written as 1233,456 or 12,456)<br>• a negative sign added or removed |
| **10. The answer is numerically or algebraically equivalent to the answer in the mark scheme.** | Answers should be given as single values in their simplest form unless the mark scheme states otherwise, for example, for $\square = 536 - 30$, the answer $500 + 6$ will not be awarded the mark.<br><br>For integer answers, for example, 20, the answer $\frac{20}{1}$ will be awarded the mark; $\frac{80}{4}$ will not be awarded the mark.<br><br>For decimal answers that include recurring digit(s), there must be an unambiguous indication of the recurring digit(s). For example, for $\frac{1}{6}$, $0.1\dot{6}$ or $0.1\overline{6}$ will be awarded the mark and for $\frac{1}{7}$, $0.\dot{1}42857\dot{}$ or $0.\overline{142857}$ will be awarded the mark.<br><br>For fraction answers that can be expressed as a mixed number, the fraction paired with the integer must be a proper fraction, for example, $1\frac{6}{4}$ will not be awarded the mark although method marks may still be available.<br><br>Where alternative responses are acceptable, this will be indicated in the 'Additional guidance' column. |

Sourced from SATs-Papers.co.uk • https://www.SATs-Papers.co.uk

**Table 3: General marking principles for paper 1 only (arithmetic)**

| | |
|---|---|
| **11. The answer in the answer box is wrong due to a misread of numbers given in the question.** | Misreads are not allowed in Paper 1; the mark(s) will not be awarded. |
| **12. The pupil has not recorded their working beneath the given long multiplication or long division.** | If a pupil carries out their working somewhere on the page other than beneath the given question as expected, then the pupil must start by rewriting the original question in order for it to be considered as a formal method.<br><br>Please note that the operation sign does not need to be given for long multiplication, provided the pupil's working shows the intention to multiply. |
| **13. The answer to the long division question expresses a remainder.** | If a pupil reaches an integer answer using a formal method with no more than one arithmetic error, for example, 25, then the mark(s) will be awarded for 25 r0 or 25.0, but the mark(s) will not be awarded for an answer of 250<br><br>For answers with a remainder, the remainder must be expressed correctly.<br><br>If a pupil shows a remainder that is the same size as the divisor or larger, for example, a remainder of 28 or 29 when dividing by 28, the mark(s) will not be awarded because the method is incomplete.<br><br>If a pupil reaches a non-integer answer using a formal method with no more than one arithmetic error, for example, when dividing by 28, the pupil reaches the answer 6 r14, then the mark(s) will be awarded for $6\frac{14}{28}$ or 6.5, but the mark(s) will not be awarded for 6 r$\frac{14}{28}$ or 6.14 or 614 |
| **14. The long division method involves subtracting chunks of different sizes.** | If a pupil's formal method involves subtracting chunks, it is not necessary to show a separate addition of the chunks. If the answer is not the correct total for their chunks, then that is treated as one arithmetic error.<br><br>A method is considered as chunking when the size of the chunks are shown alongside the algorithm.<br><br>It should be noted that this method will only be accepted if all chunks are of different sizes. |

Sourced from SATs-Papers.co.uk • https://www.SATs-Papers.co.uk

**Table 4: General marking principles for papers 2 and 3 only (reasoning)**

| | |
|---|---|
| **15. More than one method is given.** | If a pupil gives more than one method, then the intended method is taken as the one which leads to the answer in the answer box or an identified answer elsewhere. If no answer is given, then all methods must be appropriate for the method mark(s) to be awarded. |
| **16. There appears to be a misread of numbers or information given in the question that affects the pupil's working and/or explanation.** | This occurs when a pupil misreads a number given in the question and consistently uses a different number that does not alter the original intention or difficulty of the question. For example, if 243 is misread and written as 248, both numbers may be regarded as comparable in difficulty. However, if 243 is misread and written as 245 or 240, the misread number may be regarded as making the question easier. The misread of a number may affect the award of marks. Any misread number must be seen, not implied.<br><br>Where appropriate, detailed guidance will be given in the mark scheme. If no guidance is given, markers will examine each case to decide whether the mark(s) will be awarded.<br><br>The mark(s) will not be awarded if:<br>• it is a **ONE-mark** question<br>• there is more than one misread number in a question<br>• the mathematics is simplified<br>• it is an 'explain' question<br>• it is a misread of other information (not numbers)<br>• the misread number is the same as any other number in the question<br><br>For **TWO-mark** questions that have a method mark, one mark will be awarded if an appropriate method is correctly followed through with the misread number to give the correct follow-through answer, provided the mathematics has not been simplified.<br><br>For **THREE-mark** questions, refer to the additional guidance. |
| **17. A misread or an arithmetic error results in an answer with multiple decimal places.** | In some instances, a misread or an arithmetic error in a method leads to an answer with one or more decimal places. In such cases, the method mark(s) will be awarded for an answer that is correctly truncated or rounded provided the method is appropriate and the additional guidance does not specify otherwise. For example, 1.2345 is truncated to 1.2 |

Sourced from SATs-Papers.co.uk • https://www.SATs-Papers.co.uk

| | |
|---|---|
| **18. The pupil has reversed values within a calculation involving subtraction or division.** | When values within the calculation are reversed, the mark(s) will only be awarded when the answer corresponds to the correct calculation. For example, if the correct calculation is 12 ÷ 4, the method mark(s) may be awarded for 4 ÷ 12 = 3, but not for an answer other than 3<br><br>Reversed values within a calculation are not acceptable in 'explain' questions. |
| **19. The pupil omits an operation sign within their working.** | If the correct sign of +, − , ×, or ÷ for an arithmetic operation is missing, then the mark(s) will only be awarded if the working shown by the pupil is clear enough to indicate that the required operation has been performed. This applies even if the results of the required operation are incorrect. Where carrying or decomposition figures are seen, this is evidence of intention. For example, where the following is seen in working, the layout of the response implies addition or subtraction:<br><br>456<br>123<br>———<br><br>• if the answer is larger than the greater of the given values, for example, 679, then addition is implied<br>• if the answer is less than the first given value, for example, 323, then subtraction is implied |

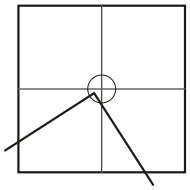

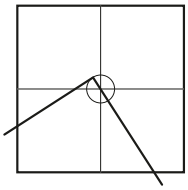

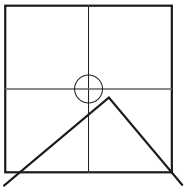

Sourced from SATs-Papers.co.uk • https://www.SATs-Papers.co.uk

| | |
|---|---|
| **20. The pupil has used 'an appropriate method'.** | For some questions, the mark scheme allows the award of the method mark(s) for 'evidence of an appropriate method', even if the answer is missing or incorrect. Refer to the 'Additional guidance' column where appropriate.<br><br>For the award of the method mark(s) for an appropriate method, there must be evidence of **all** the steps of the appropriate method (any method that would lead to the correct answer if there were no arithmetic errors and no additional steps).<br><br>This means that, for every step, either:<br>• the appropriate calculation to be carried out must be shown<br>**OR**<br>• if the calculation has not been written down, the correct answer or correct follow-through answer must be shown<br><br>Where the calculation shown would lead to a correct final answer, even if the processed numbers do not appear to be taken from the question, a method mark may be awarded unless the mark scheme specifies otherwise. |
| **21. The pupil has used a trial and improvement method.** | 'Trial and improvement' is regarded as an acceptable method, unless the mark scheme states otherwise.<br><br>For a 'trial and improvement' method to be awarded the method mark(s):<br>• there must be at least 3 trials, carried out correctly, which all reduce the range in which the answer is known to lie<br>• there can be additional trials, which are correctly or incorrectly carried out, and which may not reduce the range in which the answer is known to lie<br>• a final answer is not needed, unless the mark scheme states otherwise |

Sourced from SATs-Papers.co.uk • https://www.SATs-Papers.co.uk

| | |
|---|---|
| **22. The answer in the answer box is wrong but the correct answer is reached in the working.** | Extra working occurs when a pupil writes the correct answer in their working, and then continues to process the information further.<br><br>When the answer in the answer box is wrong and does not match the answer reached in the working, it is impossible to know why the pupil has written a different answer and it is assumed that extra working has occurred. GMP 9 on transcription errors still applies.<br><br>If the extra working does not contradict the pupil's appropriate method, the method mark(s) will be awarded.<br><br>If the extra working contradicts the pupil's appropriate method, the method mark(s) will not be awarded. |
| **23. The pupil miscopies a value from one part of their method into the next part.** | There will be instances when a pupil reaches a value in their working, then restarts from a different value.<br><br>The mark(s) will not be awarded if:<br>• it is a **ONE-mark** question<br>• there is more than one miscopy in the working<br>• the miscopy does not follow transcription error rules (see GMP 9)<br><br>The method mark(s) will only be awarded if an appropriate method is correctly shown using the miscopied number (which must follow transcription error rules). |
| **24. The correct answer is embedded in the working.** | An embedded answer occurs when a pupil shows the correct answer within their working but then selects the wrong answer from their working as their final answer or leaves the answer box blank. For example, if a pupil shows $2.5 \times 6 = 3 \times 5$ in the last line of their working and writes 5 in the answer box, whereas the correct answer is 3, then this will affect the award of marks.<br><br>Where appropriate, detailed guidance will be given in the mark scheme. If no guidance is given, markers will examine each case to decide whether the mark(s) will be awarded.<br><br>For **ONE-mark** questions, the mark will not be awarded.<br><br>For **TWO-mark** questions that have a method mark, one mark will be awarded, provided the pupil does not give redundant extra working that contradicts work already done or which adds to their appropriate method.<br><br>For **THREE-mark** questions, refer to the additional guidance. |

Sourced from SATs-Papers.co.uk • https://www.SATs-Papers.co.uk

| | |
|---|---|
| **25. The phrase 'sight of' is used in the mark scheme.** | For some questions, the mark scheme allows the mark(s) to be awarded for sight of a particular number or numbers within a method. Such numbers are the correct answers to partial steps within a method. |
| **26. The answer correctly follows through from earlier incorrect work.** | 'Follow-through' marks for an answer will only be awarded when specifically stated in the mark scheme. |
| **27. The pupil has drawn lines which do not meet at the correct point.** | Where the mark scheme states that 'slight inaccuracies in drawing' should be accepted, this means that the mark(s) will be awarded for responses marked within or on a circle of radius 2mm with its centre at the correct point.<br><br>within the circle - accepted<br><br>on the circle - accepted<br><br>outside the circle - not accepted |

# 6. Marking specific types of question: summary of additional guidance

## 6.1 Answers involving money

| | Accept | Do not accept |
|---|---|---|
| **Where the £ sign is given, for example:**<br>£3.20, £7<br>£ | £3.20 £7<br>£7.00<br>Any unambiguous indication of the correct amount, for example:<br>£3.20p<br>£3 20 pence<br>£3 20<br>£3-20<br>£3:20<br>£3;20 | Incorrect placement of pounds or pence, for example:<br>£320<br>£320p<br>Incorrect placement of decimal point or incorrect use or omission of 0 or use of comma as a decimal point, for example:<br>£3.2<br>£3 200<br>£32 0<br>£3-2-0<br>£3,20 |
| **Where the p sign is given, for example:**<br>40p<br>p | 40p<br>Any unambiguous indication of the correct amount, for example:<br>£0.40p<br>0 40p<br>£0-40p<br>0:40p<br>£0;40p | Incorrect or ambiguous use of pounds or pence or use of comma as a decimal point, for example:<br>0.40p<br>£40p<br>£0,40p |

Sourced from SATs-Papers.co.uk • https://www.SATs-Papers.co.uk

| | Accept | Do not accept |
|---|---|---|
| **Where a unit is not given, for example:**<br>£3.20, 40p<br>☐ | £3.20 40p<br>320p £0.40<br>Any unambiguous indication of the correct amount, for example:<br>£3.20p £0.40 pence<br>£3 20 pence £0 40p<br>£3 20 £0-40<br>£3-20 £0:40<br>£3:20 £0;40<br>£3;20 £.40<br>3.20 0.40<br>320 40<br>3 pounds 20 | Incorrect or ambiguous use of pounds or pence or use of comma as a decimal point, for example:<br>£320 £40<br>£320p £40p<br>£3.2 0.4<br>3.20p 0.40p<br>£3,20 0,40<br>£0,40p |

## 6.2 Answers involving time

| | Accept | Do not accept |
|---|---|---|
| **A time interval, for example:**<br>2 hours 30 minutes | 2 hours 30 minutes<br>Any unambiguous, correct indication, for example:<br>(0)2 h 30 150 minutes<br>(0)2 h 30 min 150<br>(0)2 30 2.5 hours<br>(0)2-30 $2\frac{1}{2}$ hours<br>Digital electronic time, for example:<br>(0)2:30 (0)2;30 | Incorrect or ambiguous time interval or use of comma as a decimal point, for example:<br>2.30 230<br>2.3 2.30 min<br>2.3 hours 2,5 hours<br>2.3 h 2,30<br>2 h 3 1 h 90 min |

Sourced from SATs-Papers.co.uk • https://www.SATs-Papers.co.uk

| | Accept | Do not accept |
|---|---|---|
| **A specific time, for example:**<br>8:40 am, 17:20 | (0)8:40 am<br>(0)8:40<br>twenty to nine<br>Any unambiguous, correct indication, for example:<br>(0)8.40<br>(0)8;40<br>0840<br>(0)8 40<br>(0)8-40<br>Unambiguous change to 12 or 24-hour clock, for example:<br>17:20 as 5:20 pm or 17:20 pm | Incorrect time, for example:<br>8.4 am<br>8.40 pm<br>Incorrect placement of separators, spaces, etc. or incorrect use or omission of 0 or use of a comma as a decimal point, for example:<br>840<br>8:4:0<br>8.4<br>084<br>8,40 |

## 6.3 Answers involving measures

| | Accept | Do not accept |
|---|---|---|
| **Where units are given, for example:**<br>8.6 kg<br>kg<br>m<br>l | 8.6 kg<br>Any unambiguous indication of the correct measurement, for example:<br>8.60 kg<br>8.6000 kg<br>8 kg 600 g | Incorrect or ambiguous use of units or use of comma as a decimal point, for example:<br>8600 kg<br>8 kg 600<br>8,60 kg<br>8,6000 kg |

If a pupil gives an answer with a unit different from the unit in the answer box, then their answer must be equivalent to the correct answer provided, unless otherwise indicated in the mark scheme.

If a pupil leaves the answer box empty but writes the answer elsewhere on the page without any units, then that answer is assumed to have the units given in the answer box, subject to the conditions listed above.
