

Who am I?

I am the largest planet in the solar system,

Five away from the sun

More than 1300 of my fellow Earth can fit inside
me,

Deadly poisonous gasses surround me,

Who can I be?

All around me are magnetic fields,

They are very strong, protecting me.

My famous part is the red spot,

Raging gas storms, quite contrary.

Surrounding my core,

I have an ocean,

Quite unusual, liquid hydrogen.

Who do you think I am?
