

## **Who am I?**

Rings for sale,  
Rings right here,  
Floating around my atmosphere.  
The biggest and the brightest in the whole of eternity.

I have many moons  
Titans, Rhea, Mimus  
These are quite a few.

I am a gas giant,  
Five point eight is my mass  
I'm bigger than the rest.  
Except my best friend who thinks he's the best.

Hydrogen, Methane and Helium  
Is what I'm made of.  
Lightest of them all,  
Therefore, I spin faster than the rest.  
Maybe I really am the best after all!

Who am I?
