

What am I?

I'm the god of the skies

I'm a mix of a few dyes

I'm covered in a dozen of rings

But I'm not about that bling bling

I'm as slow as a snail

But not that frail

I rotate on my side

like a fairground ride

I'm 1.8 billion miles away from the sun

And I weigh much more than a tonne

By Jadon

A dozen of rings.

Coldest planet.

Can fit 64 earths inside it.

84.07 years to orbit the sun

Seventh planet from the sun 1.8 billion miles away

Made of gas

27 moons

Made of frozen elements

I rotate on my side

I was found in 1871

2871 million km away from the sun
