

The book that I am writing about is actually a manga series that I have read and enjoyed called naruto. I like it because it is nonstop action filled. Even when you finish this book there is others when he is older then there is a story about his kid. It's just endless and they are still making some. The main character in this story is a boy called Naruto and he wants to for fill his dream of becoming Hokage which is someone who is respected by everyone and has overall authority.

I have now put the books in order.
